

AIO Android Monitor

Your Android™ World just got Bigger!

Product Introduction

Embrace the next generation of cloud computing with the HANNspree AIO Android Monitor. It delivers simplified computing for the novice or a full-on computing experience for the expert.

Browse the web, consume digital content, run Android™ apps, create and edit documents and access cloud based and local applications, the Home Tablet Box transform PC Computing.

The Hannspree AIO Android Monitor transforms the standard PC display into an interactive infotainment centre by marrying HANNspree's Windows 8 certified touch screen monitor series to a new Android box featuring the Android OS and an integrated touch module.

Connect the HANNspree Android Box with our 23" touch monitor for a Full HD touch experience that makes gaming, surfing and video smooth, putting the world of Android™ at your fingertips and enjoy a terrific Android™ browsing experience.

Full access to thousands of Android™ apps, synchronise your e-mail accounts, calendar, contacts and with the flick of a finger, customise your desktop with widgets and apps. You'll always have super responsiveness and amazing performance.

- Wi-Fi and Ethernet
- HDMI connectivity
- Android 4.4

HANNspree

PRODUCT DESCRIPTION, SMART WAY OF TOUCH COMPUTING

The HANNspree AIO Android Monitor combines the simplicity of Android™ with the power and productivity of a home computer.

It expands your productivity by offering a perfect solution to check your e-mail quickly, edit documents and make it even more flexible by downloading many of the business applications available in the market, making it a truly viable alternative to a conventional computer, all within a very low power consumption, space saving and versatile design.

You can browse the Internet, work on your documents, host web meetings and perform almost all the key tasks of a standard desktop of All-In-One PC.

Perfect thin client solution for Education, SMB and Enterprise customers.

HANNspree

Features

Android™ "Ease of Use" Experience

Very easy to use device, users can enjoy a tablet-like browsing experience. Enjoy the intuitive operation of Android™ Kit Kat 4.4 – with thousands of productivity and entertainment apps readily downloadable from the market on a much larger touch screen than typical Android™ devices. The clear, easy-to-use user's interface helps you to browse intuitively which can be sorted by rating, category or popularity.

Big multi-touch LED screen....a mega-size tablet

Combine the Android Box with one of the HANNspree Touch monitors and you'll have an Android™ based system with a large format LED display. Available in 23" (HT231HPB), our touch screens have 1080P Full HD resolution that can deliver great image quality with superior detail and sharpness, making them an ideal fit for graphic design, watching movies and business applications that require professional monitor performance.

Your Android™ world just got a whole lot bigger.

Touch Experience

If you love Angry Birds on your smartphone, imagine playing it on a generous HANNspree 23" Full HD 1080P touch screen. The HANNspree Touch monitors are based on the latest 10 points projected capacitive touch technology, which gives you the same outstanding user experience as your smartphone and tablets, creating a rich and intuitive experience, allowing you to open, edit and zoom your documents without needing any additional peripherals. You can use the touch capabilities for entertainment while browsing the web or playing games making your experience even more natural, simple and enjoyable. The Android Box + HANNspree Touch monitor gives you the ultimate Android™ experience.

Quad Core CPU, 1.6Ghz

High speed CPU, capable of delivering fast processing capabilities for your applications and creating a smoother interaction when you're browsing, pitching or zooming your photos, videos and general documents.

Perfect for surfing the web, delivering a true enjoyable web experience

Surf the web, access the cloud, keep in touch with friends and family through your social networks. Whether viewing your favourite news channels, checking your e-mail, chatting with friends and family, downloading new dinner recipes or just working on file through Google docs, the Home Tablet Box is your perfect connected device to internet.

Wireless and Bluetooth for easy configurations

The Android Box comes with integrated Wi-Fi. It is simple and quick to set-up in any environment without the need of additional cables and pre-installations, giving quick and flexible Internet access. Alternatively you can also use the Ethernet LAN connector (RJ45 port) for wired access to internet. With Bluetooth capability, you can easily transfer contents from your mobile device, or connect a wireless Bluetooth keyboard and mouse.

Features

Miracast

Wi-Fi CERTIFIED Miracast™ is a groundbreaking solution for seamlessly displaying video between devices, without cables or a network connection. Users can do things like view pictures from a smartphone on a big screen display, share a laptop screen with the conference room projector in real-time, and watch live programs from a home cable box on a tablet.

Expand the Storage

The Hannspree Android Box comes with a Micro SD memory slot to expand the internal memory up to 32Gb.

Perfect for Education

The HANNSpree Android Box + Touch monitor are the right tool to enable young children to express their creativity with e-painting, learn their ABC's or use interactive educational apps.

Touch Digital Signage Solution

The HANNSpree Android Box + Touch Monitor can also be used for creating public kiosks, touch digital signage, etc... Just install on the device a specific Kiosk web browser application, it locks down the user interface so that the user isn't able to adjust Android system settings. The HANNSpree Home Tablet is an interesting solution for vertical applications such as interactive kiosks in schools, hotels, shopping centers and many more.

Smart Adjustable "book" Stand

Get comfortable with your touch screen. You can easily adjust the stand of the HANNSpree touch monitor so you can use it in various ergonomic positions. Set your preferred viewing and touch angle, from 10 to 60 degrees, or lay the unit flat.

Built-In Speakers

Immerse yourself with the high quality audio. The HANNSpree Touch Monitors are equipped with built-in 2 x 1.5 Watts stereo speakers.
